## NORTH VALLEY DISTRICT 2010 FIRST AID MEET

### Fall Victim with Puncture Wound Scenario

Scenario: Your patrol is hiking near Tenderfoot Pass when the patrol hears a scream and sees a male lying at the bottom of the canyon. While the patrol is approaching the victim, you observe that it is an approximate 25 year old male that is conscious. The victim then removes a branch (approximately 1/2" in diameter) that impaled him in the left thigh (upper leg) and then goes unconscious. The male tumbled down the canyon approximately 50 feet. Upon reaching the victim, you notice the puncture wound is not bleeding heavily, but is oozing blood. It is unknown if he sustained any other injuries during the fall.
