LEHIGH DISTRICT
2021 FIRST AID MEET

Scenario #4: Electrical Burns

Scenario: An IM-6 Battlefield Medical Droid arrives from the Nebulon-B Medical Frigate *Redemption* to help Jedi Knight Rian Crawler. The medical droid plugs into a power socket and the droid starts sparking and going haywire. One of your patrol members grabs the droid to pull it away from the damaged power socket and receives partial thickness (2nd degree) burns to both palms of their hands and a ½" oozing laceration below the right elbow. The patient states he has no allergies.

Until the droid repair technician can fix the IM-6 Battlefield Medical Droid, the patrol will have to take care of the burns and laceration. Nearby is a sonic water dispenser and a med kit.

The patient's condition starts to change as the patient is now pale, cold, has clammy skin, is breathing rapidly, and has a rapid heartbeat.

There is no need to seek further assistance, as the droid will be repaired shortly and the *Redemption* is preparing to make the jump to light speed to rendezvous with the fleet near the planet of Sullust.
