LEHIGH DISTRICT 2026 FIRST AID MEET

Scenario #3: The Flag

Scenario: After treating William Tough and getting him on his way, the patrol checks the Omni and finds that the light is green. Shortly after checking the Omni, the patrol flies through space and lands within a Fort. The patrol looks at the entrance to the fort and they notice a sign that says, “Welcome to Fort McHenry”. It is dawn, raining, bombs are blasting in the air, and the patrol sees the red glare of rockets, so they take cover inside a building. The building they are in is the Armory. The Omni states that it is September 13, 1814.

The patrol sees a soldier carrying a large flag folded in a triangular shape and running towards a flagpole within the fort. A bomb explodes overhead and the soldier collapses to the ground. The soldier is not getting up but is moving on the ground. The patrol decides to act and rescue the soldier. They get the soldier into the building along with the flag he is clutching.

The soldier has a severe laceration to his lower right leg about 4” below the knee. The wound is bleeding profusely and is spurting blood.

The soldier also has a broken left wrist. He is conscious and alert but is starting to feel lightheaded. He tells you that the flag must be raised.

A patrol member is told by another soldier nearby that there is a doctor outside of the Fort and gives them directions to his home.
